DecisionOne IT Support Solutions for Airline and Airport Customers

Wayne, PA – Tuesday, February 12, 2018

DecisionOne Corporation, the leader in Workplace IT Managed Services, Multi-device Support and Full Cycle Asset Management, announced the release of additional case studies around its Airline and Transportation support services competencies.

While the state of the Airline and Transportation Industry is strong, the world’s 20 busiest airports alone saw roughly 1.5 billion passengers pass through its terminals last year according to data from trade group Airports Council International. Affordable fuel cost and savvy management resulted in record profits; but a closer look still reveals some important challenges. Insufficient investment in technology infrastructure over the past decade can cause computer outages that can cripple an airline's operations for days on end.

“DecisionOne IT support solutions for customer facing equipment, as well as multi-device, back office and asset management services can provide significant improvements in efficiency that drive customer satisfaction and increase uptime”, stated Dan Della Ventura, EVP at DecisionOne.

In addition to handling thousands of flights in the air at any point in time and over a billion passengers, security and cybersecurity threats continue to stress airlines and airport agencies around the globe. Current IT and its support investments are critical to maintaining an operational and secure environment.

“We have 25+ years servicing the Airline and Transportation Industry, including Cleared and Certified IT Technicians capable of supporting kiosks, printers, scanners, tablets (iOS, Android and Windows), workstations, boarding pass printers and credit card readers that are relied on to keep customer traffic moving”, Della Ventura further stated.

DecisionOne is the largest independent provider of IT Infrastructure services and offers a wide range of services that apply to Airports and Airlines globally. In the air or on the ground, DecisionOne has IT Support service offerings that add value.

As consumers needs and competitive pressures challenge customers, DecisionOne is uniquely positioned to help travel industry focused organizations compete. Find additional case studies and information resources at www.decisionone.com or by calling toll free 800-767-2876.
